

9th International Conference
Complex Systems Design & Management Paris
December 18-19, 2018 - Paris, France

Call for presentation - Startups

Co-organized by

The 9th edition of the international conference «Complex System Design & Management» Paris (CSD&M Paris) will take place next December in Paris about « **Products and Services development in a digital world** ».

CSD&M, created in 2010 by CESAMES, is now one of the key event of the system engineering community in Europe and in North America.

The conference gathers the main academic, governmental and industrial actors, CSD&M is one of the few places where you can talk about industrial complex systems in as broad a manner as possible (methods, tools, sciences, business cases...).

CSD&M 2018 will be held on 2 days throught different formats. Speakers, partners, academics and industrial participants will have numerous opportunities to exchange.

Daniel KROB

General Chair de CSD&M Paris 2018
Institute Professor, Ecole Polytechnique
President of CESAMES
INCOSE Fellow

CSD&M participants are...

- **Managers and Directors** (Innovation, Strategy, Technology, Engineering, R&D, Systems of Systems Departments, ...)
- **Engineers** (Systems Engineers, Systems Architects, Safety Engineers, Processus and Methods Engineers, Project Managers, ...)
- **Engineering tools vendors and software editors**
- **Academics**

... from different domains:

Aeronautic

Aerospace
& Defence

Transportation

Construction

Healthcare

Electronic

Energy

They participated in previous CSD&M:

And many others...

IN PRACTICE

- **2 days – December 18 & 19 – in Paris**, to exchange about societal & industrial challenges and scientific & methodological state of the art in the field of systems modelling and management.
- **More than 250 international attendees** (academics, industrials) – main actors of the international systems engineering community, at the heart of your sales target
- **Keynotes presentations** in plenary session, **pitch startups**, **thematic workshops**, workshops dedicated to **research projects** and numerous teams selected to present their academic and professional works
- **1 Poster Session** to promote some work in progress and discuss on topics related to complex systems
- **Demonstrations and booths** to present offers, services and the latest technological news
- **Numerous opportunities for networking**

PRESENTATION

This year, CSD&M wishes to **give startups the opportunity to present their projects** to the main players of the international systems engineering community.

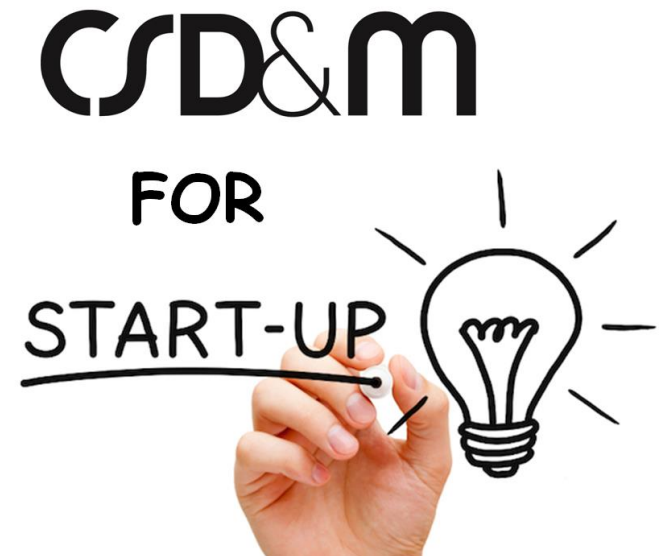

If you are a startup and your service or product offer is about **complex products / services design and manufacturing**, submit your presentation at CSD&M.

The jury, composed of the conference Organizing Committee members, will meet at on September 30 to select the startups that will get a pitch at the conference.

Each selected startup will get a **3-minute plenary pitch** as well as **a visibility on site during 2 days** (at the “startups booth”).

POURQUOI PARTICIPER A CSD&M ?

Meet and exchange with more than 250 international participants, key players in the international engineering community to **increase your XX** and **identify and build new relationships**.

YOUR PROFILE

- You are a **startup**,
- Your **service offer is related to the main theme** of the conference : Products & Services development in a Digital World,
- You have an **innovative project** to share with the systems engineering community.

REGISTRATION PROCESS

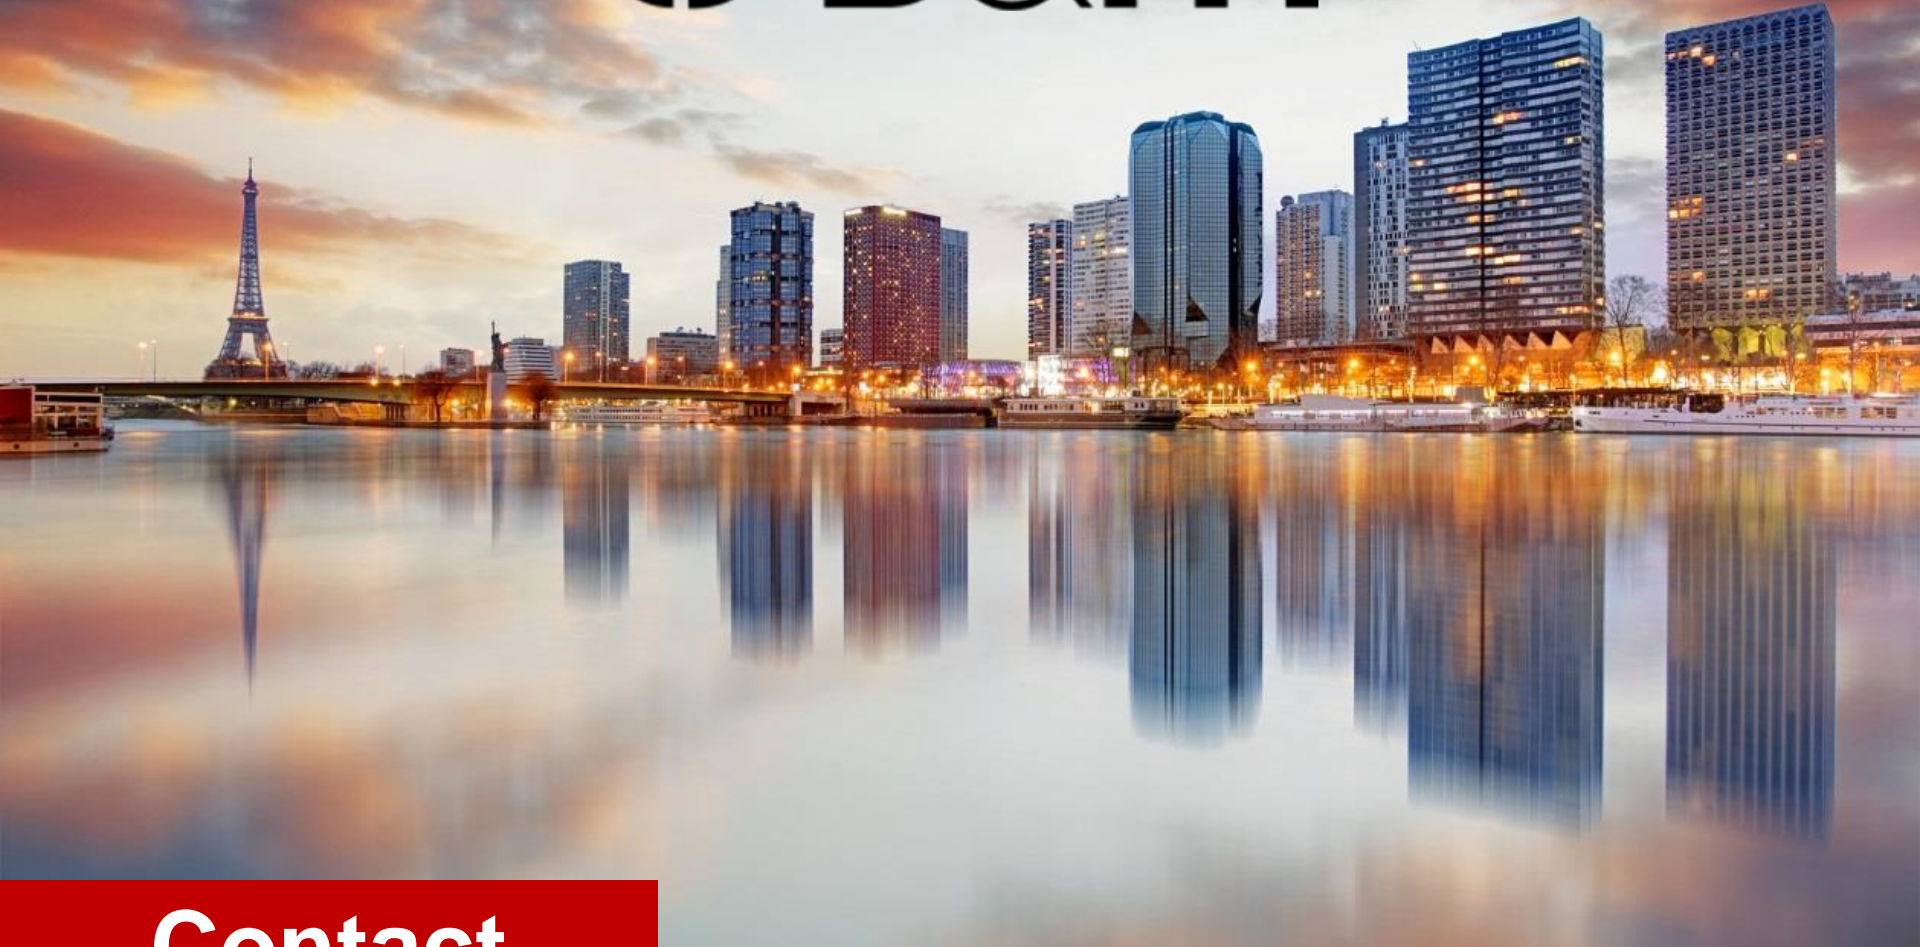

- Duly complete this **registration form** : <http://www.2018.csdm.fr/call-for-proposals-startups/>
- Send your registration form by e-mail to cecile.quelle@cesames.net imperatively **before Friday 31 August 2018 at midnight**

The jury, composed of the members of the Organizing Committee will select the best projects. The results announcement is planned on September 30, 2018

IF YOUR PROJECT IS SELECTED:

- **Register** to the conference to validate your participation
- **Prepare your 3-min pitch** (we will provide you with some guidelines)
- **Prepare your venue to CSDM** and your visibility at the “startups booth” to promote your project and share with other participants
